

DECK+RAILING

Design Visualize Estimate Sell

EASY - EFFICIENT - PRODUCTIVE

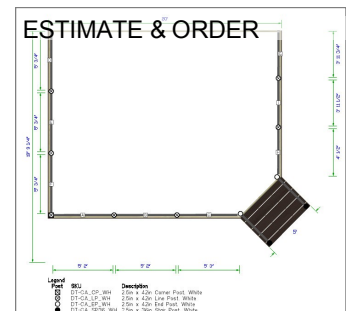

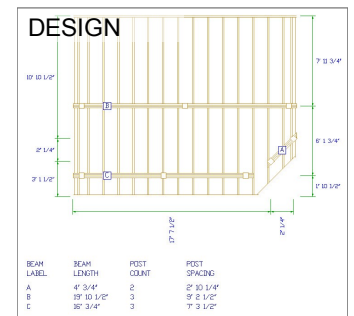

- Fastest and easiest program to learn, the most powerful deck design program available
- Superior graphics allows customers to see their new deck & railing on their own home - you close more sales
- Never forget a part again, the design is all inclusive and correctly engineered using manufacturers specific products
- Built-in engineering using manufacturers product libraries ensures you have the correct materials, and is customizable to meet local building codes
- Efficient design and material calculations helps maximize your profitability and customer satisfaction
- 3-D imaging, detailed plans and cut lists; use any manufacturer's product or railing system, or your own
- Link with POS and accounting systems so you are using your own pricing, and avoid duplicate data entry
- Adjust markup/margins/gross profit globally, or on individual items; variable pricing can increase gross profits
- Stand-alone or network versions; highly customizable to your needs
- Detailed labor calculations; quickly create professional quotes
- Integration with available, sophisticated Installed Sales Software
- Comprehensive training and support included
